ACADEMIC PATHAWY:

1. Academic certificates: Undergraduate
2. Degrees: Associates in applied science in cybersecurity
3. Courses:
 - a. CIS 106 – Computer Logic and Programming Technology
 - b. ENG 101 – Composition I
 - c. NET 101 – Orientation to Cybersecurity Careers
 - d. NET 105 – Information Technology Fundamentals
 - e. NET 121 – Computer Networking
 - f. CIS 226 – Programming for Cybersecurity
 - g. ENG 102 – Composition II
 - h. NET 240 – Linux Server Administration
 - i. NET 260 – Windows Server Administration
 - j. NET 280 – Cybersecurity Fundamentals
 - k. NET 262 – Windows 365 Administration
 - l. NET 281 – Enterprise and Network Security
 - m. NET 283 – Ethical Hacking and Penetration Testing
 - n. NET 284 – Digital Forensics
 - o. SPE 101 – Fundamentals of Speech Communication
 - p. CIS 211 – IT Project Management
 - q. NET 282 – Cybersecurity Governance, Risk Management, and Compliance
 - r. NET 290 – Cloud Computing
 - s. NET 298 – Cybersecurity Capstone

t. SOC 101 – Introduction to Sociology

CERTIFICATIONS:

1. CompTIA Network+ by the end of my first year
2. CompTIA Security+ somewhere in year 2.
3. CySA+ after graduation
4. CISSP when I get enough experience.

COMPETENCIES:

1. Computer networking, knowledge on operating systems of all kind, cybersecurity principles and security functions, knowledge on firewalls, VPNs, knowing how to differentiate suspicious activity and security threats and diagnosing them as well. Knowing how to be cooperative/collaborative, good communication skills, explanation skills, time management, attention to detail, adaptability, professionalism.

PLAN:

1. Short term goals: I would like to get any certificates within the next two years while I go to school.
2. Long term goals: work as a cybersecurity analyst and get as many certificates as I need to progress my career. I want to work at palo alto networks or at a local hospital.
3. Educational institutions and programs: Harper college and CompTIA for their certifications.
4. Timeline: all of the CompTIA certifications within 3 years.
5. Extra-curricular activities and opportunities: Harper college cybersecurity club, there are events that I would like to try out like a CTF or Def-con.
6. Internships/apprenticeships: I would like to do an apprenticeship for cybersecurity analyst positions, there are a lot of them available all over the country that I would like to look at. I imagine when I go through the program there will be even more avenues of internships to apply too. There are a couple of government positions that seem interesting as well.
