

Input	Process	Output
# of shares	Assign variable for # of shares	Amount invested
Cost per share	Assign variable for cost per share	
Name of share	Assign variable for name of share	
	# of shares x cost per share	
	Display amount invested	

Input	Process	Output
Score of midterm	Assign variable for midterm score	Last name
Score of final exam	Assign variable for final exam score	Total exam points
Name of student	Assign variable for name of student	
	40% of midterm + 60% of final exam	
	Display total exam points	

Input	Process	Output
Amount received	Assign variable for total amount received	Received equal compensation
	Assign variable for amount distributed	
	Total amount / 3 people	

	Display equal compensation	
--	----------------------------	--

Input	Process	Output
make	Assign variable for msrp amount	Make
model	Assign variable for discount %	Model
msrp	Assign variable for make	MSRP
Discount %	Assign variable for model	Discount percent
	$\text{Msrp} * \text{discount \%} = \text{amount off}$	Amount off
	$\text{Discounted price} = \text{msrp} - \text{amount off}$	Discounted price
	Display the make, model, msrp, discount %, amount off and discounted price.	

Input	Process	Output
radius	Assign variable radius	Area
	$\text{Pi} * (\text{radius} * \text{radius}) = \text{area}$	Perimeter
	$2 * \text{pi} * \text{radius} = \text{perimeter}$	
	Display the perimeter and area
